Subject: Tech Summit

Hi CJ,

Rob and Jeremy at JTST confirmed that MTICS is the lead on the Tech Summit. However they informed us that JTST is likely to have a announcable that will come as a result of the LNG summit in the summer that could be socialized at the tech summit in the fall. They didn't provide any further info and so I will work with them on this going forward.

Kevin

That would work well. I'm happy to come to your office or set up a conference call. Let me know what you prefer.

Thanks,

Jennifer Wray

Thanks Rish,

Great to meet you Jennifer.

How about meeting next Thursday April 2 at 10am?

Kevin

Hi Kevin –

Happy to set up a meeting to discuss conference planning. I'm out of the office early next week but back Thursday.

Thanks,

Jennifer Wray

Hi Rishi,

Do you know who is organizing the LNG conference?

I've been tasked with the Tech conference in the fall and want to make sure they're aligned.

Thanks,

Kevin

Good to hear from you Kevin – no, I haven't had a chance to discuss your conference with anyone as of yet. Yes, let's connect tomorrow.

I'm available between 8:30 and 10:40am – and after 3pm tomorrow.

Regards,

Todd Bailey

Hi Todd,

CJ Ritchie passed on your resume to me as someone who may be able to help with the tech conference planning (if you haven't heard, we're planning to have a tech conference in the fall). I am unsure what conversations have occurred and so wanted to touch base with you to close the loop.

Do you have some time tomorrow for a call to chat about this? Trish can help you find a time that works.

Thanks,

Kevin

2015 LNG in BC Conference – Made in BC Technology Forum Concept Paper

The Made in BC Technology Forum will take place October 14 - 16 alongside the LNG in BC Conference as a way to showcase B.C.'s vibrant technology industry and our world-class research and innovation infrastructure. By combining these two events, international investors from all over the world will see first-hand B.C.'s competitive advantage not just in the LNG sector but also as a destination for technology investment. B.C. technology and research organizations will be provided an unprecedented opportunity to connect directly with the international investment community and promote their products and solutions to over 3000 participants from across the globe.

This forum will provide B.C. technology enterprises and research institutes an opportunity to demonstrate industry leadership, engage with youth and First Nations communities, showcase success stories and present case studies which demonstrate technical excellence while leveraging international exposure through the LNG in BC Conference attendance.

Space at the Vancouver Convention Centre will be dedicated to four concurrent themes:

- Clean technology
- Information and communication technologies (ICT) and wireless
- Digital and screen-based media
- Health and life sciences

Trade Show Exhibit:

A significant area of the LNG in BC Conference trade show will be dedicated to B.C. technology, research and innovation organizations. Participating B.C. technology companies will be eligible for the LNG-Buy BC program (space limited) which will offer free exhibit space to BC based businesses.

An interactive stage for independently-organised workshops and presentations will also be available on the trade show floor. Delegates from all over the world will experience the LNG in BC trade show and will be exposed to the best and brightest B.C.'s technology sector has to offer.

Career Fair:

The 2014 LNG in BC Conference brought over 1400 youth from all over B.C. to participate in WorkBC's Find Your Fit career experience and to interact with Post-secondary institutions and B.C. businesses and international proponents. This year's conference will again include WorkBC's Find Your Fit program and a job fair component which will provide a chance for trade show attendees to connect with employers, including B.C. technology and innovation companies directly.

The youth program will also include a one day LNG in BC Scholarship Challenge where Grade 12 and Post-secondary students will be invited to compete for scholarships (sponsorship opportunity) by taking part in specific challenges related to the field of LNG clean technology innovations. Space on the trade show floor will be created to allow youth to showcase the results of their challenges and to interact and share their ideas with various industry representatives from all over the world. A panel of learning institution representatives will select winners and scholarships will be awarded at a celebration event.
